PROFESSIONAL SUMMARY

Final-year Computer Science Engineering student (CGPA 8.78/10) who builds data dashboards and predictive tools in Python, SQL, and Power BI. Experienced in cleaning raw datasets, running exploratory data analysis, and turning insights into clear visuals. Seeking a Data Analyst, Business Analyst, or Analytics Intern role.

TECHNICAL SKILLS

- **Data Analytics:** KPI Analysis, Data Validation, Data Quality Checks, Data Visualization, CSV Data Handling, Exploratory Data Analysis (EDA)
- **Excel:** Data Cleaning, Formulas, Sorting & Filtering, Pivot Tables, Charts
- **Dashboard Development:** Interactive Dashboards, Data Filtering, Data Export, Scenario Analysis
- **Web Development:** HTML, CSS, JavaScript
- **Framework:** Streamlit
- **Tools:** Microsoft Excel, VS Code, GitHub, Netlify

PROJECTS

NexusIQ – Interactive Data Analytics Web Application Live demo
- Built with HTML, CSS, and JavaScript to upload CSV datasets, explore data, calculate KPIs, identify data quality issues, and perform what-if scenario analysis.
- Includes a chatbot for dataset guidance, project documentation, troubleshooting, resume support, and interview preparation.

FinGuard – Fraud Detection & Transaction Intelligence Live demo
- Built a Streamlit app where users upload transaction CSV files and get a risk score for each transaction.
- Added input validation checks and adjustable risk thresholds so users can flag suspicious activity.

CarePulse – Healthcare Analytics Dashboard Live demo
- Built a dashboard analyzing appointment attendance and no-show patterns.
- Added data validation, segment filters, and export options to help users find patient trends.

Retenza.pro – Customer Churn & Retention Intelligence Live demo
- Built a churn dashboard showing customer lifecycle, monthly charges, and risk profiles.
- Used customer segment charts to show which groups are most likely to leave.

Retail Sales & Profit Intelligence Dashboard Live demo
- Built a dashboard tracking sales, profit margins, and loss-making transactions by region.
- Added interactive trend charts that load directly from tabular source files.

Jeevan Raksha – Emergency Assistance Web App Live demo
- Developed an emergency web app with a one-tap SOS alert.
- Ranked in the Top 50 at a college hackathon.

Smart-Map-Pro – Interactive Location Service Live demo
- Built a responsive map app that uses geolocation APIs to find nearby landmarks.
- Added voice search for hands-free navigation across browsers.

EDUCATION

- **B.Tech, Computer Science and Engineering**, Siddharth Institute of Engineering and Technology, Puttur | CGPA: 8.78/10 (through 3rd year)
- **Intermediate (MPC)**, Sri Vidyavikas Junior College | 929/1000
- **SSC**, Rankers English High School | 597/600

CERTIFICATIONS & WORKSHOPS

- Introduction to Internet of Things (NPTEL) | Introduction to IoT 4.0 (NPTEL) | Quantum Technology Workshop (WISER Program)

LANGUAGES

- English, Hindi, Telugu, Urdu
